# WELCOME TO DAVA FOODS – OUR WORLD OF EGGS

Since our foundation in 1980, we have worked with eggs in innovative and creative ways. To us, an egg is so much more than just an egg – it has many facets – from the soft-boiled egg to the baked and cooked food. To us, it is the world's best food.

As Nordic market leader, it is our responsibility to continuously challenge the egg's facets to enhance its value and create outstanding products. With our DAVA and whitePRO™ brands we push the envelope, we think along new lines and we turn the category a little upside down.

Through innovative processes and creative development, we focus on creating value for our customers throughout the entire value chain.

However, regardless of which product we develop, quality and food safety remain crucial concepts in our HACCP-based quality management system.

In this product catalogue, you can read more about our current products, about why high quality and food safety matters, and about how sustainability relates to egg production.

Best regards,

The DAVA Foods team

# DAVA Foods

## TIMELINE

# ABOUT DAVA Foods

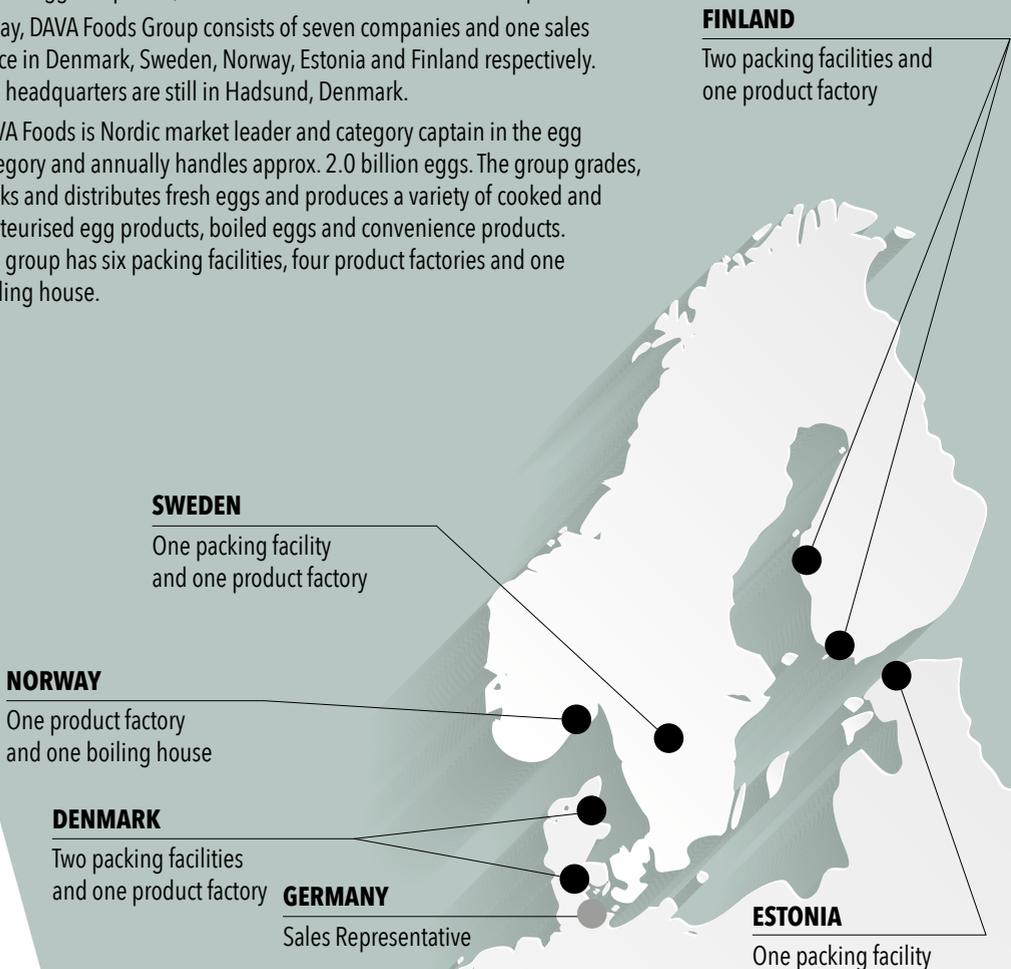

DAVA Foods is a modern food company that has deep roots in the agricultural sector. Earlier, the company worked with breeding and egg production and only had a minor packing facility. Gradually the breeding and egg production was phased out, and today, DAVA Foods is a major food company with packing and production facilities.

## From Danish to Nordic

Throughout the 2000s and 2010s, DAVA Foods acquired stocks in several Nordic egg companies, which now form the DAVA Foods Group.

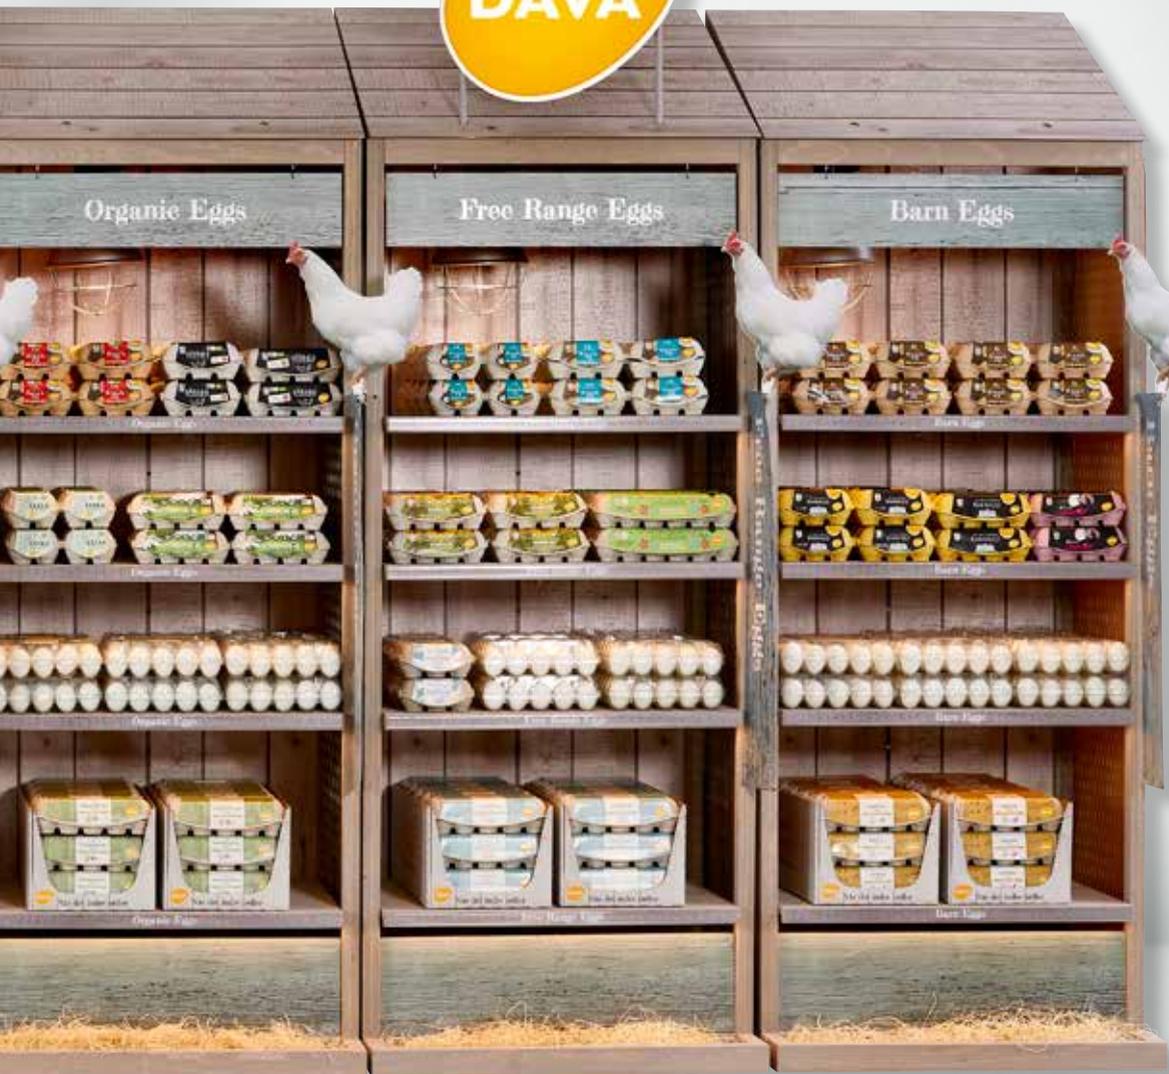

Today, DAVA Foods Group consists of seven companies and one sales office in Denmark, Sweden, Norway, Estonia and Finland respectively. The headquarters are still in Hadsund, Denmark.

DAVA Foods is Nordic market leader and category captain in the egg category and annually handles approx. 2.0 billion eggs. The group grades, packs and distributes fresh eggs and produces a variety of cooked and pasteurised egg products, boiled eggs and convenience products. The group has six packing facilities, four product factories and one boiling house.

**WE ARE CATEGORY CAPTAIN  
THIS IS OUR WIDE, DEEP AND  
INNOVATIVE PRODUCT RANGE**

Barn Eggs

# Fresh Eggs

We aim to set the trend when we develop new fresh egg products. All our fresh eggs - both our core product line and our concept eggs - are carefully and innovatively developed to target current consumer trends, always with a view to be environmentally friendly. In the following chapter, you can read more about our fresh eggs.

# ABOUT DAVA ORGANIC EGGS

## DAVA FOODS TAKES ORGANIC EGG PRODUCTION TO A NEW LEVEL

The Sustainable Egg is made with careful consideration for what is good for you as consumer, the environment, animals and the farmer.

### CARING ABOUT BIODIVERSITY

The farmer has stripes of wild flowers and plants in his fields that are good for the insects and animal wildlife. The farm has beehives that contribute to a good plant and animal life.

### HOMEGROWN FEED

30-40% of the hens' feed is grown in the farmer's own fields or in neighbouring fields. 100% of the roughage comes from the farmer's own fields.

### \*RISE SUSTAINABILITY ANALYSIS

The Sustainable Egg comes from farmers whose farms have received a very positive evaluation according to RISE, an internationally renowned model for measuring sustainability on farms. The analysis facilitates a holistic assessment of the actual farm.

RISE is originally a Swiss sustainability analysis model, but in Denmark it is the company SEGES that conduct the analyses.

### OUR DEFINITION OF SUSTAINABILITY:

*"An egg is sustainable when it is produced in an environmentally friendly way, the animal welfare is high, the farmer has good living conditions, and the egg is safe and natural for people to eat."*

# ABOUT DAVA FARM EGGS

## FACTS

- Organic eggs from small, selected Danish farmers
- Regularly welfare screenings at the farm
- Max. 3000 hens per flock
- Max. six flocks per farm, a total of 18.000 hens
- A min. of 70% vegetation in outdoor area is required
- The outdoor area must offer at least equivalent to 4 m<sup>2</sup> per hen
- Hens are fed with organic feed and roughage

APPROVED BY  
ANIMAL PROTECTION  
DENMARK

The label "Approved by Animal Protection Denmark" is used for selected food products and is your guarantee of a high level of animal welfare in the production. The label recommends egg, milk and dairy products as well as meat from approved producers of cattle, pigs, poultry and lamb.

#### SELECTED DANISH FARMERS

Farm Eggs comes from small, selected Danish and organic farmers, who have the hens' welfare as their top priority and whose eggs are approved by Animal Protection Denmark.

#### ANNUAL CONTROL

The farmers receive annual control from both DAVA Foods and Animal Protection Denmark to ensure that all standards are kept, and the animal welfare between the hens are high.

## PRODUCT

DAVA Free Range Sunflower Eggs, pulp

## GOOD FOR YOU, THE WILDLIFE AND THE SOUTH AMERICAN RAINFOREST

### SOLSİKKE ÆG = SUNFLOWER EGGS

'Sunflower Eggs' are made with consideration for what is good for you as consumer, the South American rainforest and its multifarious wildlife.

**SOY-FREE  
FEED**

### NO SOY

Sunflowers Eggs are free range eggs where the hens have not been fed with soy. This means we have chosen to replace the content of soy in the animal feed with i.a. sunflower.

**GMO  
FREE  
FEED**

### EUROPEAN FEED

Sunflower is cultivated in European fields by the Black Sea under responsible conditions without deforestation and without the use of GMO in the production.

# ABOUT DAVA FREE PLAY EGGS

## PRODUCT

DAVA Free Range Eggs, pulp

**FREE PLAY - FAMILY TIME IS PLAYING TIME**

In cooperation with the scouts, DAVA has made this funny egg tray with one single purpose: to get children and adults to play more. The scouts' vision is that through play, fellowship and invention we challenge and activate ourselves and the world we live in.

The games and plays scouts uses can vary from club to club, but elements such as music and being outside in nature often is a part of the games.

**INSIDE PRINT: NATURE BINGO**

Go into nature and find one of each thing. Place them in the egg holes and when the tray is full shout 'bingo'.

DAVA Organic Brunch Eggs, pulp

### BRUNCH EGGS

A good brunch starts with eggs. Brunch can be a pleasant weekend activity with friends and family, as well as a casual way of celebrating birthdays.

### EGGS ARE RICH IN PROTEIN

Eggs have a high content of protein - 12.3 g per 100 g. Protein is important as it contributes to maintain and increase muscle mass. Protein is also the nutrient that takes most energy to burn off which gives you higher satiety.

**DANISH DIABETES ASSOCIATION**

DAVA Foods has initiated a cooperation with the Danish Diabetes Association. The organisation will have their logo on all DAVA barn egg trays till the end of 2023. Together DAVA Foods and the Diabetes Association will bring attention to the topic of health and healthy lifestyle - and where eggs fit in.

# ABOUT DAVA VITAMIN EGGS

## FACTS

- Nutritiously enhanced eggs
- Barn eggs from Danish hens
- Rich in vitamin D
- Rich in vitamin E
- Rich in selenium
- Extra vitamins and mineral benefitting the consumer

ITEM NO.	CONTENT	PRODUCT
109160	8 M/L	DAVA Vitamin Barn Eggs, pulp

NUTRITION FACTS PER 100 G		RICH IN
		Min. 30% of reference intake
Vitamin B2, riboflavin	0.44 mg	31%
Vitamin B12	1.84 µg	74%
Vitamin D	1.48 µg	30%
Vitamin E	4.45 µg	37%
Selenium	24.1 µg	44%

Vitamin Eggs are laid by hens fed with feed that is nutritiously enhanced with the mineral selenium and vitamin E. The increased levels of vitamin D, vitamin E and selenium are passed on to the egg, which benefits the consumer.

**D**

**VITAMIN D** contributes to the maintenance of normal muscle function and normal bones

**E**

**VITAMIN E** contributes to the protection of cells from oxidative stress

**SELEN**

**SELENIUM** contributes to the normal function of the immune system

**B<sub>2</sub>**

**VITAMIN B<sub>2</sub>/RIBOFLAVIN** contributes to the maintenance of normal vision

**B<sub>12</sub>**

**VITAMIN B<sub>12</sub>** contributes to the reduction of tiredness and fatigue

# ABOUT DAVA BARKHOLT EGGS

FACTS	ITEM NO.	CONTENT	PRODUCT
· Barn eggs from Danish hens	109186	6 L/XL	DAVA Barkholt Barn Eggs, pulp
· Eggs from our Danish farmer: Nis-Jørn Diederichsen	109154	8 M/L	DAVA Barkholt Barn Eggs, pulp
· Eggs from a family-owned farm	109169	30 M/L	DAVA Barkholt Barn Eggs, bulk
· Eggs with extra yellow yolks			
· More than 50% of the feed is home-grown			
· The farm has its own pullet rearing			

### A FAMILY FARM

The Barkholt farm is a true family-owned farm and was built in 1872 by Nis-Jørn's great-great-grandfather, Asmus Diederichsen. The farm is almost 150 years old and has a rich history agriculturally and personally in relation to the Diederichsen family. Now Karen and Nis-Jørn Diederichsen are representing the 5th generation of this family of farmers. Having four children themselves, the 6th generation should be secured.

### HOMEGROWN FEED

At Barkholt, more than half of the feed (e.g. wheat and rapeseed) is grown in the farm's own fields. At the same time, the hen droppings are used as fertilizer for the fields.

### DEEP YELLOW YOLKS

The egg yolk of a Barkholt Egg is particularly yellow, which is due to the well-balanced composition of the feed, which is blended with natural plant dyes derived from marigolds and paprika.

### ROAMING FREE

All Barkholt hens are free to move around in the barn in a sheltered environment, benefiting from aviary conditions that promote their natural behaviour. All hens have access to nests, perches and scratching area for dust bathing.

### PULLET REARING

Barkholt has its own rearing. It gives better animal welfare and reduces the environmental impact.

# ABOUT BASIC EGGS

## FACTS

- Hens lives in enriched cages
- Max. 10 hens per cage
- Min. 750 m<sup>2</sup> floor space per hen
- Access to nests and perches
- Access to dust bathing
- Fed with conventional feed
- Beak trimming is prohibited

### YOUR SAFETY GUARANTEE

Our Danish DAVA eggs are unique, as in Denmark eggs are laid by hens that are tested free from salmonella infection. Whilst EU Standards require a test every 15 weeks, Danish standards require a test to be performed every second week. DAVA Foods' producers are subjected to salmonella testing and control every single week - guaranteeing our customers a safer choice.

We ensure complete traceability and transparency from farm to table.

All Danish eggs from DAVA Foods Denmark A/S are stamped with the following code:

0=organic eggs, 1=free range eggs,  
2=barn eggs, 3=cage eggs  
DK=Denmark, 12345=farm number.

# ABOUT DAVA QUAIL EGGS

## FACTS

- Gourmet delicacy
- Large quail eggs – special breed
- Easy to use
- Contains omega-3
- High content of protein
- Tested free from salmonella

## ITEM NO.    CONTENT    PRODUCT

## KNOWLEDGE ABOUT WHOLE EGGS

When cooking and baking whole eggs can function as a binding agent. When heated, whole eggs have the ability to bind the various ingredients together. This is valuable when getting meatballs, falafels, pancakes and similar food to stick together. Also, whole eggs can be used to make omelets, pies, pastries and others.

## KNOWLEDGE ABOUT EGG YOLKS

When cooking and baking the egg yolk can be used as both a smoothing agent and an emulsifier. As smoothing agent, the egg yolk's ability to mix or smooth is useful when making e.g. ice cream, mousse, crème brûlée, custard and sauce. As emulsifier, the egg yolk's ability to emulsify is mainly used when making mayonnaise, bearnaise or hollandaise sauce.

## KNOWLEDGE ABOUT EGG WHITES

When egg whites are whipped, they gain air. It is particularly useful for preparing food such as gratin, mousse, meringue and swiss roll. The best results are achieved when the egg white is at room temperature. When whipped to foam, the egg white can expand up to eight times its volume.

At DAVA Foods, we ensure the whipping ability by testing batches of egg whites regularly. This way, we can always deliver the best possible product.

### EGGS AND THE MAILLARD REACTION

When eggs are used for brushing bread and similar, the Maillard reaction happens when baking the goods in the oven. The Maillard reaction is a chemical reaction that happens between amino acids and reducing sugars when they are exposed to heat, which gives food the desirable brown crust and distinctive taste. When using egg glaze for baking, it participates in the Maillard reaction – giving your baked goods great flavour and a beautiful golden crust.

**10% EGG YOLKS**

Our organic mayonnaise contains 10% egg yolk, thus ensuring a more creamy taste and texture.

**KNOWLEDGE ABOUT MAYONNAISE**

Mayonnaise is an emulsified, cold sauce of egg yolk, oil and acid, e.g. vinegar. Mayonnaise is originally from France, but is today known and eaten worldwide. Mayonnaise can be served for a variety of dishes as dip or topping, but is also frequently used as base for other sauces such as remoulade and sauce tartare.

# ABOUT DAVA EGG BITES

## FACTS

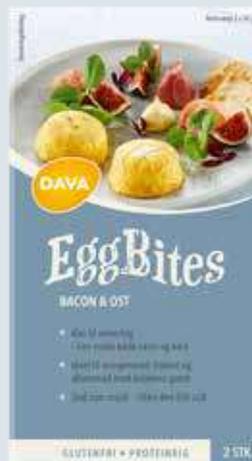

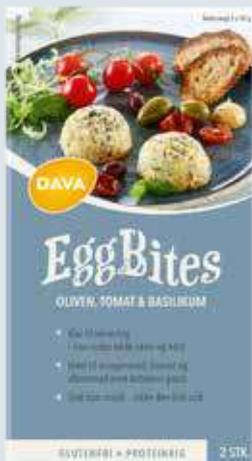

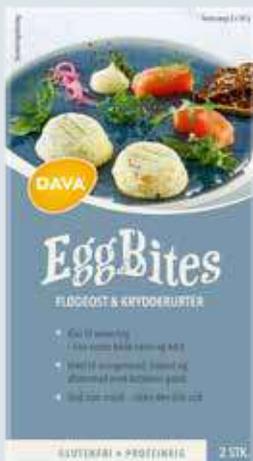

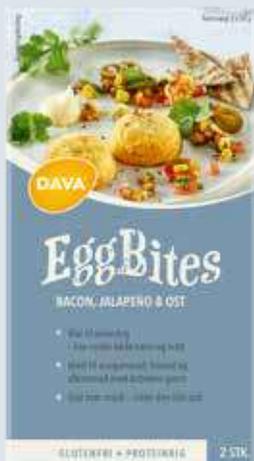

- Made with free range eggs
- Tasty egg muffins
- Ready to eat - can be eaten cold or warm
- Made in sous-vide
- Easy to prepare: only takes 2 min. in the micro oven
- Gluten-free

### TASTY READY TO USE PRODUCTS

Our ready to use products are tasty and delicious! The egg products have a natural egg flavour, and the gourmet pancake is a delicious bomb of cocoa and hazelnut flavour. The products are time-efficient – they are quick to prepare, so you easily and rapidly can meet the demand of your customers. The products can be used for several occasions – from the brunch buffet to the plated evening menu to takeaway.

## Active

Each and every one of us is active at some level every day, some at a higher level than others. However, regardless of the level of activity, protein is important throughout life for all people, no matter what gender and age they are, we all need protein.

Protein matters, as it helps us increase and maintain muscle mass. Protein also contributes to the maintenance of normal bones.

In the following chapter, you can read more about our high-protein products.

# ABOUT WHITEPRO™ AMBIENT EGG WHITES

**10.5g**  
PROTEIN  
per 100g

**45 KCAL**  
per 100g

## FACTS

- Pure egg whites
- High content of protein:  
10.5 g per 100 g
- 45 kcal per 100 g
- Contain all BCAA\*  
(\*Isoleucine, Leucine and Valine)
- Liquid consistency and does not  
coagulate
- Free from preservatives and additives
- Sugar-free
- Fat-free
- Odourless and neutral taste
- 14 days shelf life after opening

\*whitePRO™ contains:

DAVA

### THE DAVA EGG - A SAFER CHOICE

The Danish egg production is a world leader when it comes to food safety, traceability and animal welfare. We believe this to be the reason why our eggs are in high demand in countries outside Denmark.

Our 'DAVA - A safer choice' eggs represent a unique selection of organic and free range eggs in a variety of sizes and packaging for export sale.

### YOUR SAFETY GUARANTEE

Our Danish DAVA eggs are unique, as in Denmark eggs are laid by hens that are tested free from salmonella infection. Whilst EU Standards require a test every 15 weeks, Danish standards require a test to be performed every second week.

DAVA Foods' producers are subjected to salmonella testing and control every single week - guaranteeing our customers a safer choice.

We ensure complete traceability and transparency from farm to table.

All eggs from DAVA Foods Denmark A/S are stamped with the following code:

0=organic eggs or 2=cage-free barn eggs, DK=Denmark, 12345=farm no.

### YOUR GUARANTEE OF ANIMAL WELFARE

All our Danish organic and free range eggs, eggs under the 'DAVA - A safer choice' label, are guaranteed to be laid by hens that have all-year access to attractive outdoor areas with a minimum of 70% vegetation. Here, they can move freely, pecking around in the outdoor area, flapping their wings.

We do not allow beak trimming on any of our farms, as animal welfare is of major importance to us.

# ABOUT WORLDWIDE EXPORT

DAVA Foods Denmark  
A SAFER CHOICE 

## FACTS

- Barn hens live indoors in a barn and can move around freely
- The hens must have access to nests and perches in the barn
- The scratch area is covered with straw, wood, shavings, sand, or peat
- A max. of 9 hens per m<sup>2</sup> is allowed in the barn
- Hens are fed with conventional feed
- Continuously control from Danish authorities
- Weekly salmonella testing
- Beak trimming prohibited

# DAVA POS MATERIAL

## WHAT'S INSIDE MATTERS

# ABOUT FOOD SAFETY

## Farm to Table

One of the cornerstones of DAVA Foods' business is our "Farm to Table" concept that sets high standards for quality, food safety, production and animal welfare. Our strict control system assures quality throughout all stages of the production process and value chain.

## HACCP

DAVA Foods has created and implemented an HACCP-based quality management system applicable to all our breeders and egg producers. The quality system ensures the production of eggs in terms of quality, food safety, production conditions and animal welfare. The system has been developed in collaboration with egg producers and is continuously being evaluated and improved.

## Animal welfare

The hens' welfare is another important aspect of our concept. If their welfare does not meet both our and our customers' expectations, action plans and follow-ups will be initiated at the individual producer. All in all, DAVA Foods is highly focused on food safety and everything this implies.

## Our production certificates

# FARM TO TABLE

Through our attachment to the feed and agro-industrial business in Denmark and The Baltic region, traceability is ensured throughout the entire value chain related to manufacturing feed and feedstuff mixes. Similarly, the food safety and the quality are ensured through the many inspections that take place in the value chain.

# ABOUT DANISH EGGS

## WHAT DOES THE SHIELD SYMBOLIZE?

### FLAG = DANISH ORIGIN

The egg is Danish and produced with care and consideration throughout the entire value chain.

### EGG = FOOD SAFETY

Danish eggs are safe with one of the world's strictest salmonella controls.

### HEART = HEALTH

Eggs have several nutritional values, i.a. they have a high content of protein and are rich in riboflavin, vitamin B12 and vitamin D.

### HEN = ANIMAL WELFARE

Danish egg producers focus a lot on animal welfare, i.a. beak-trimming is prohibited in Danish egg production.

DANISH EGG  
ASSOCIATION

# DANISH EGGS

The Danish egg production is characterized by high quality and food safety throughout the value chain. Danish eggs are subject to strict and intensive salmonella and quality controls, which ensures that Danish eggs are among the safest in the world.

As an example, Danish egg producers must submit samples for salmonella testing every other week - the EU requirement is every 15 weeks. At DAVA Foods, we take food safety seriously and go even further: our egg producers must submit samples weekly for salmonella testing.

## **Easy recognition**

It is easy to spot a Danish egg. Firstly, all Danish DAVA egg trays are marked with a "Danish Egg Association" mark to show that the eggs inside the tray are Danish. Also, all Danish eggs from DAVA are emblazoned with the characteristic shield on the shell.

# ABOUT ANIMAL WELFARE & DANISH ORGANIC EGG PRODUCTION

DAVA Foods and our egg producers work every day to ensure high animal welfare for the hens regardless of production type, but we are especially proud of our organic egg production in Denmark.

Denmark is a pioneer in organic egg production and generally in organic farming, and, also, Denmark is the only country in the world that has its own organic logo. The red "Ø" logo, which all of our organic products bear.

Aside from the EU legislations, Denmark has special requirements for organic farmers and organic rearing is one of them.

## **Organic rearing**

All organic pullets are reared organically and they have access to outdoor from they are only 6 or 9 weeks old. In the summer, the pullet is allowed access to outdoor areas from it is 6 weeks old. In the winter, from it is 9 weeks old.

When the pullet is 16-18 weeks old, it is moved to the egg producer and start egg-laying from when it is approx. 20 weeks old.

## **Welfare screenings**

We take organic egg production very seriously. We work with a screening tool, which enables us to get a realistic picture of the condition of the organic hens. Through on-site screening and concrete action plans in case of problems, the egg producers can positively influence the welfare of their flocks.

## **Signs of animal welfare**

One of the ways to tell whether a hen is thriving, is to look at the plumage and see if the hen is full-feathered. It is also a sign of good animal welfare in the flock if there are soft fine feathers in the litter, as it shows the hens get sufficient protein, minerals and vitamins from the feed and moult as they should.

## ANIMAL WELFARE IN DANISH ORGANIC EGG PRODUCTION

In livestock production, animal welfare is important. To enhance animal welfare, Danish organic egg production ensures:

- The outdoor area should be covered in vegetation to provide shelter and shade for the hens
- The outdoor area must offer min. 4 m<sup>2</sup> per hen
- The hens must have access to nests and perches in the barn
- The scratch area is covered with straw, wood shavings, sand, or peat, allowing the hens to dust bath and be stimulated
- The barn must provide natural daylight
- A maximum of 6 hens per m<sup>2</sup> is allowed in the barn
- A maximum of 3.000 hens per flock
- Hens are fed with organic feed and roughage
- Continuous inspections by authorities
- Beak trimming is prohibited

# ABOUT SUSTAINABILITY

## MAKING THE EGG SUSTAINABLE

"Is it possible to make the environmentally-friendly egg even more friendly? 'YES' is the short answer. We are Scandinavia's biggest supplier of fresh shell eggs and we work daily on having an even more sustainable and responsible production. We contribute to the 17 Sustainable Development Goals, because we can and we want to."

- Ivan Noes, Group CEO

Read more about DAVA Foods' sustainability policy at [www.davafoods.com/sustainability](http://www.davafoods.com/sustainability)

# SUSTAINABILITY

At DAVA Foods, we want to act responsibly towards the environment in which we operate and the people we work with - locally as well as globally.

Therefore, we work actively with UN's Sustainable Development Goals every day and throughout the entire value chain, from farmer to finished product.

**We work with the following goals:**

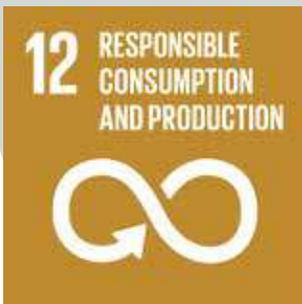

DAVA Foods works towards better health for all consumers.

We sponsor a pre-school project in Moshi, Tanzania.

DAVA Foods aims to optimize its process equipment and machinery.

DAVA Foods strives to reduce food waste and aims at using recyclable packaging.

We work towards zero carbon emission in 2050.

DAVA Foods increases focus on organic and free-range growth.

# ABOUT RESPONSIBLE PACKAGING

We aim to set the trend, when we develop new products. All our fresh eggs – both our core product range and our concept eggs – are carefully and innovatively developed to target current consumer trends, always with a view to be environmentally friendly.

## Responsible packaging

DAVA fresh eggs come in responsible single-use packaging that is considerate towards environment and nature.

## Plastic trays

Our plastic trays are environmentally friendly, as they are produced of recycled soft drink bottles in PET plastic.

## Pulp trays

The pulped-paper egg packaging is produced exclusively from biodegradable moulded fibre and is 100% recyclable and biodegradable, meaning that it can degrade back into the ecosystem.

Both packaging options are available as branded label or private label.

  
THE TRAY IS  
MADE FROM 2  
PLASTIC BOTTLES

**12** RESPONSIBLE  
CONSUMPTION  
AND PRODUCTION

DAVA Foods strives to reduce food waste and aims at using recyclable packaging.

## CATEGORY DEFINITION AND MEANING

-  Organic egg/product
-  Storage: max. 4 °C / (DK: max 5 °C)
-  Storage: room temperature
-  Deep frozen

### **PAPER & ENVIRONMENT - HOW TO PROTECT IT WHEN PRINTING?**

The paper for this product catalogue has been chosen with careful consideration. Thus it is FSC certified paper which helps preserve the forest from deforestation - no more wood is harvested than the forest itself naturally can reproduce. Our printers are also certified with the Nordic Swan Ecolabel, ensuring the use of environmentally appropriate paper, vegetable and water based colors, as well recycling unused printed matters and using renewable energy sources. Ultimately, the product catalogue is printed in Demark, supporting Danish production worksites and ensuring social responsibility for the employees.
